STANDARD FEATURES
- 202 racks per hour
- Opti-RinSe™ system
- Patent Pending Rapid Return Conveyor Drive Mechanism
- Insulated hinged double doors with door interlock switches
- Patent Pending Door Seal System
- 19.5 inch chamber height opening
- Top mounted micro-processer control module
- Energy saver mode
- Dirty water indicator
- Low temperature alert
- Conveyor dwell
- Delime notification
- Service diagnostics
- NAFEM Data Protocol compliant
- Patent Pending Computational Fluid Dynamic Designed Self-Aligning Wash Manifolds
- Stainless steel debossed anti-clogging wash arms
- Patent Pending Removable Integrated Pump Intake Screen
- Stainless steel self-draining pumps and impellers
- Single, sloping scrap screen and deep basket
- Stainless panels enclose perimeter and bottom
- Door actuated drain closure
- Single point electrical connection (three phase only), does not include the booster heater
- Convertible hot water or low temp final rinse
- Vent fan and booster heater control

DIRECTION OF OPERATION
- Right to Left
- Left to Right

VOLTAGE
- 208/60/1
- 240/60/1
- 380/60/3
- 208/60/3
- 240/60/3
- 480/60/3
- 600/60/3

MODEL
- CLPS66e – Dishwasher

OPTIONS AT EXTRA COST
- Stainless steel pressure-less 15 KW or 30 KW booster heater
- Higher than standard chamber

ACCESSORIES
- Stainless steel vent hoods
- Direct drive unloader
- Side loader
- Blower-dryer
- Drain water tempering kit

Specifications, Details and Dimensions on Inside and Back.
THE CLe WAREWASHER IS NOW STANDARD WITH MORE EFFICIENT FEATURES THAN EVER . . .

Inside and out the CLe warewashers by Hobart are packed with standard components and patented design innovations that make them the biggest value in the dishwasher industry.

The insulated hinged inspection doors provide easy access in the chamber. Exterior wash pipes and reduced interior baffles reduce clean-up time. The patented Rapid Return drive allows for a wide separation between the wash and the rinse zone.

Wash Manifolds. Patent pending Computational Fluid Dynamic designed wash manifolds are self-aligning and come with Hobart’s signature debossed anti-clogging nozzles for superior result.

Opti-RinSe™. Hobart’s exclusive patent pending Opti-RinSe™ significantly reduces operating cost by reducing rinse water and the energy required to heat the water. The unique spray pattern uses large droplets to more efficiently sanitize the ware.

OTHER STANDARD FEATURES . . .

- **Patent Pending Thermal Layer Curtains** help keep the heat inside the machine.
- **Patented Ball Detent Clutch Conveyor Drive** for maximum protection against conveyor Jams
- **Patent Pending Integrated Removable Pump Intake Screen** to offer the ultimate guard of keeping debris from entering the pump.
- **Patent Pending Hinged Door Seals** and stainless steel labyrinth seal for drip-free operation
- **Low-Temp Convertibility In Field.** All machines shipped hot. Change software in field at set up to low temperature if desired – then, if requirements change, convert from one mode to the other in the field. An exclusive feature – standard from Hobart.
- **Door Actuated Drain Closure.** Closing the door automatically actuates drain closure, eliminates extra manual steps, ensures that closure is in the correct position.

The Hobart exclusive microprocessor control module offers a choice of many features, such as an exclusive Energy Saver Mode, Low Temperature Alerts, and Dirty Water Indicator. It also displays pertinent machine status and has a Delime Notification. The controls have built-in Service Diagnostics and are NAFEM Data Protocol Compliant.

Soil Management System. Screen design sheds soil more easily than flat screens, reduces frequency of cleaning — easy to empty large soil particles . . . Just lift out the scrap basket.
AVAILABLE OPTIONS AND ACCESSORIES . . .

Flexibility is synonymous with Hobart CLe dishwashers. If your operation demands a dishwasher with a vent hood, an extended hood . . . a power scrapper, just specify the combination of options that suit your needs.

Built-in Pressureless Stainless Steel Booster Heater.
Interwired and interplumbed. Saves on installation and saves floor space. Simplifies operation with just one switch to power dishmachine and booster.

Side Loader. Save up to 20 square feet in the dishroom layout with an optional C-Line Side Loader. Racks are indexed 90° into the dishwasher automatically – a feature that cuts space and reduces labor dramatically. Your dishroom team will appreciate this feature.

OTHER AVAILABLE ACCESSORIES . . .
Blower-dryer, steam booster heater, and a single-point electrical connection to include electric booster heater.

---

WARNING

Electrical and grounding connections must comply with the applicable portions of the National Electrical Code and/or other local electrical codes.

CAUTION: Certain materials including silver, aluminum, and pewter are attacked by sodium hypochlorite (liquid bleach).

ATTN: Plumbing connections must comply with applicable sanitary, safety, and plumbing codes.

Suggested track and table layout

View showing hole locations in turned down portion of table

Sectional view showing table connections

Track height above tank lip 1/4" - 5/16"
**MISCELLANEOUS NOTES:**

Optional vent hoods or extended hoods exhaust requirements; 200 CFM entrance end. 400 CFM exit end.

All dimensions taken from floor line may be increased approximately 3/4" or decreased 1/2".

66" inside tank (at table connection)

44 1/2" table to table

Net weight of machine: 770 lbs (std height)

Domestic shipping weight: 876 lbs (std height).

---

**PLUMBING NOTES:**

*Electric, Steam, and Gas Heats*

Water hammer arrestor (meeting ASSE-1010 standard or equivalent) to be supplied by others.

Common water supply line at service connection.

Recommended water hardness to be 3 grains or less for best results.

For non-booster machine (P16 cone), recommended building flowing water pressure to the dishwasher is 20 PSI (15 PSI min. - 25 PSI max). If pressures higher than 25 PSI present, a pressure regulating valve with internal thermal expansion bypass, must be supplied by others in the water line to the dishwasher.

For convenience when cleaning, water tap should be installed near machine with heavy duty hose and squeeze valve.

When used, chemical sanitizing feeder must be certified to NSF standard 24.

PLUMBING NOTES:

ELECTRIC, STEAM, AND GAS HEATS

WATER HAMMER ARRESTOR (MEETING AS55-1018 STANDARD OR EQUIVALENT) TO BE SUPPLIED (BY OTHERS) IN
COMMON WATER SUPPLY LINE AT SERVICE CONNECTION.

RECOMMENDED WATER HARDNESS TO BE 3 GRAINS OR LESS
FOR BEST RESULTS.

FOR NON-BOOSTER MACHINE (P15 CONN):
RECOMMENDED FLOWING WATER PRESSURE TO THE
DISHWASHER IS 30 PSI, (15 PSI MIN. - 25 PSI MAX).
IF PRESSURES HIGHER THAN 25 PSI ARE PRESENT, A PRESSURE
REGULATING VALVE WITH INTERNAL THERMAL EXPANSION BY-PASS,
MUST BE SUPPLIED (BY OTHERS) IN THE WATER LINE TO THE
DISHWASHER.

FOR CONVENIENCE WHEN CLEANING WATER TAP SHOULD BE
INSTALLED NEAR MACHINE WITH HEAVY DUTY HOSE AND
SQUEEZE VALVE.

WHEN USED, CHEMICAL SANITIZING FEEDER MUST BE CERTIFIED TO
NSF STANDARD 24.

STEAM HEAT ONLY

FLOWING STEAM PRESSURES ABOVE 60 PSI MUST HAVE A
PRESSURE REGULATOR (BY OTHERS) INSTALLED IN THE
STEAM LINE.

SHUT OFF VALVE MUST BE SUPPLIED (BY OTHERS) IN THE
STEAM LINE TO THE DISHWASHER.

PLUMBING CONNECTIONS
CONNECTION INFORMATION
(AFF = ABOVE FINISHED FLOOR)

LEGEND

ELECTRIC, STEAM, AND GAS HEATS

P2 DRAIN: 2" FPT, 7-3/8" AFF TWO POSSIBLE CONNECTIONS; MAY BE DRAINED TO EITHER SIDE OF VALVE, PLUG OPPOSITE SIDE.

P3 SANITIZER FEEDER: REMOVE 1/8" NPT PIPE PLUG TO ACCESS TAPPED HOLE, 1/8" NPT 59-1/2" AFF (LOW TEMP ONLY)

P4 RINSE FEEDER: REMOVE 1/8" NPT PIPE PLUG TO ACCESS TAPPED HOLE, 1/8" NPT 99-9/16" AFF

P5 DETERGENT PROBE SENSOR; REMOVE CAP AND STUD ASSEMBLY TO ACCESS 7/8" DIA HOLE (WASH TANK ONLY), 14-5/8" AFF

P6 INDIRECT DRAIN-FLOOR SINK; BY OTHERS, 0"AFF. WHEN REQUIRED, INSTALL FLOOR SINK OUTSIDE THE PERIMETER OF THE DISHWASHER.

P15 COMMON WATER CONNECTION: 1/2" FPT, 17-3/16" AFF, HIGH TEMP W/O BOOSTER 140°F MIN, 194°F MAX, LOW TEMP 120°F MIN.

P16 COMMON WATER CONNECTION: 1/2" FPT, 11-3/16" AFF HIGH TEMP W/15K BOOSTER 140°F MIN, HIGH TEMP W/30K BOOSTER 110°F MIN.

STEAM HEAT ONLY

P7 STEAM COILS: 10 TO 50 PSI FLOWING, 3/4" FPT, 11-1/8" AFF.

P8 CONDENSATE RETURN: A 10 PSI MINIMUM DIFFERENTIAL pressure across the steam trap must be maintained, 3/4" FPT, 11-1/8" AFF ONE CONNECTION. (ONE DUCKET TYPE TRAP FURNISHED).
SPECIFICATIONS: Meets requirements of A.S.S.E. Standard No. 1004.

DESIGN: Semi automatic, high or low temperature single-tank, rack-type dishwasher with flexible patent pending thermal layer curtains at the ends of chamber and between wash and final rinse zones. Insulated hinged inspection doors located in front of machine provide easy access to wash arms, rinse arms, strainer, strainer basket, and pump intake screen. Length of machine inside tank (at table connection) 66”. Machine designed to clean and sanitize with hot water 160°F wash and 180°F (minimum) final rinse, or low temperature 130°F wash and 120°F final rinse and a chemical sanitizer. Water hardness recommended to be 3 gr. for best results. Automatic interlocks shut off pump and conveyor if door is opened when machine is in operation.

CONSTRUCTION: Tanks, chambers, frame, legs, control box, doors, and all panels are constructed of stainless steel.

PUMPS: The two recirculating stainless steel pumps and impellers with ceramic seat seals. Easily accessible pump assembly permits quick inspection. The pumps are self-draining. All piping distributing water to the upper and lower wash arms is stainless steel tubing.

PUMP MOTORS: Built for Hobart 2 hp grease-packed ball bearings, splash proof, ventilated with manual, resettable inherent overload protection. Available in electrical specifications of 208-240/60/1, 208-240/60/3, 480/60/3 and 600/60/3. Also available, but not submitted for UL listing are 200-240/50/3 and 380-415/50/3.

CONTROLS: A stainless steel control module with power and “start/stop” buttons is mounted on top of the machine. Machine control circuitry will be operated from a 120-volt control circuit transformer. Electrical components are completely wired with 105°C, 600V thermoplastic insulated wire with stranded conductors routed through UL listed electrical conduit or covered wire way.

CONVEYOR: Patent Pending Rapid Return drive, designed for more even throughput of racks and allows for a 16-inch separation between the wash and the rinse zone. Racks conveyed automatically through wash and rinse zones and onto clean dish table. Patented Ball Detent Clutch drive prevents damage to machine or racks, should movement of racks be obstructed. Rack tracks, conveyor structure, and drive units of stainless steel for 19¼” x 19¼” racks as standard. Conveyor speed: 5.6 FPM.

DRIVE MOTOR: Built for Hobart, ¼ horsepower gear motor, ventilated with manual, resettable inherent overload protection. Available in electrical specifications of 208-240/60/1, 208-240/60/3, 480/60/3 and 600/60/3. Also available, but not submitted for UL listing are 200-240/50/3 and 380-415/50/3.

STEAM: One-inch stainless steel steam coil. Tank water temperature is controlled by microprocessor controlled thermostat with positive low-water protection and magnetic contactor. (Disconnect switches not furnished.) A high limit device mounted on the surface of the tank additionally protects heating element.

WASH TANK HEATING SELECTIONS (must choose one):

- ELECTRIC: One electric Incoloy® sheathed immersion heater (15 KW) removable from inside tank. Tank water temperature is controlled by microprocessor controlled thermostat with positive low-water protection and magnetic contactor. (Disconnect switches not furnished.) A high limit device mounted on the surface of the tank additionally protects heating element.

- GAS: Regulated infrared immersion tube gas burner system. Microprocessor controlled thermostat and a blower with a pressure switch control tank water temperature. Positive low water protection is provided. A high limit device mounted on the surface of the tube additionally protects immersion tube. A solid-state igniter board controls the gas valve and provides flame ignition. A transformer steps the control circuit voltage down from 120 volts to 24 volts to power the igniter board and gas valve. For natural gas, gas pressure to burner (customer connection) not to exceed 7” W.C. For LP gas, gas pressure to burner (customer connection) not to exceed 11” W.C. If gas pressure is higher than 7” W.C. natural or 11” W.C. LP pressure regulating valve must be supplied (by others) in the gas line to the dishwasher.

OPTIONAL EQUIPMENT AT EXTRA COST:

- Stainless steel pressureless booster heater. Stainless steel vent hoods with vent stack and locking-type damper. Higher than standard chamber. Side loaders and unloaders. Floor mounted steam booster. 19¼” x 19¼” peg, combination and miscellaneous racks. Table limit switch. Drain water tempering kit.
